

OVERVIEW

The following proposal is being delivered ahead of CE Broker's inclusion on the upcoming meeting agenda for the Kansas State Board of Nursing on September 15th, 2021.

Our organization (CE Broker) works with more than 130 licensing agencies in 21 US States to serve over **2.7 million licensed professionals** with a modern, paperless method to track and report CE requirements for State Licensure Renewals.

Desired Impact

1. Provide Board Staff with an efficient, digital method to access CE documents and proof of competency in the event of an audit, as well as a paperless platform for application approvals.
2. Work with Nationally Accredited (ANCC) & State Approved Educational Providers to collect completion records, for use in audits by Staff members of the Nursing Board.
3. Provide all licensed professionals with **free accounts** to digitally report, manage, monitor, and submit records in accordance with State Requirements.
4. Provide Educational Providers with a suite of free tools to manage accredited offerings, and directly report attendance data & course completions for verification of CE activity.

Easing the Burden of Regulation & Reporting

CE Broker was developed to streamline the reporting process for license holders, while providing state boards with an efficient method of verifying CE Compliance. Our platform has been shown to dramatically increase compliance rates, by making competency requirements clear and easy to understand for license holders, while simultaneously spreading awareness of renewal requirements, and reducing the volume of CE-support related requests to agencies across the country.

Proven Success in Nursing

CE Broker has been utilized by a growing number of Nursing Boards - including Florida, South Carolina, New Mexico, Georgia, DC, West Virginia, Arkansas, North Dakota, Mississippi, and Kentucky. Through these partnerships, we've also forged relationships with hundreds of ANCC accredited nursing CE providers that now report course completions directly into CE Broker.

No-Cost Solution

Our platform is independently funded through a mixture of advertising revenue via educational providers and optional subscription services for licensed professionals. There are **no costs** to the State Board for implementation, support, or customization pertaining to CE Requirements. Additionally, Licensed Professionals and Educational Providers have access to an entire suite of tools for complete CE Management without any mandatory cost or fees.
