Laura Kelly, Governor

Kansas State Board of Nursing

October 28, 2026

Dear Kansas Nurse Licensure Verification User,

The Kansas State Board of Nursing (KSBN) appreciates your organization's continued partnership and commitment to ensuring appropriate verification of nursing licensure credentials.

We understand that your organization may currently utilize one or more KSBN licensure verification services. As part of our ongoing efforts to modernize agency operations, improve efficiency, and strengthen access to accurate and timely licensure information, KSBN is transitioning employers and other stakeholders to the Nursys e-Notify licensure verification system.

Discontinuation of Existing Verification Services

Effective **February 1, 2027**, KSBN will discontinue the following licensure verification services:

- KSBN Free Licensure Verification Website — the existing public verification portal maintained through Kansas.gov.
- KANNCheck Subscription Service — the subscription-based licensure verification and monitoring service currently available to participating organizations.

Following this date, organizations will need to utilize alternative verification resources, including Nursys e-Notify, to obtain and monitor Kansas nursing licensure information.

Transition to Nursys e-Notify

KSBN strongly encourages organizations currently utilizing these services to begin transitioning to Nursys e-Notify well in advance of **February 1, 2027**. Developed and maintained by the National Council of State Boards of Nursing (NCSBN), Nursys e-Notify offers:

- Automated monitoring of nursing licensure status and notifications of status changes.
- Alerts regarding publicly available disciplinary actions.
- Centralized access to nursing licensure information across participating jurisdictions.
- More efficient monitoring of nursing workforce credentials.

Supporting Organizations Through the Transition

KSBN recognizes the importance of maintaining uninterrupted access to licensure information for employment verification, credentialing, regulatory compliance, and patient safety. KSBN is coordinating with NCSBN to identify opportunities to simplify enrollment and assist Kansas employers and healthcare organizations in adopting Nursys e-Notify. Additional enrollment information and resources are included with this communication.

Requested Response by December 1, 2026

To support an orderly transition and identify potential challenges, please respond to this notice no later than **December 1, 2026**. In your response, please:

1. Acknowledge receipt of this notification.
2. Indicate whether your organization currently uses the KSBN verification website, KANNCheck, or both.
3. Identify questions, concerns, or anticipated challenges associated with transitioning to Nursys e-Notify.
4. Advise KSBN of any additional information or assistance needed to complete the transition.

Our Continued Commitment

KSBN remains committed to reliable access to nursing licensure information while responsibly modernizing the systems that support employers, healthcare organizations, and the public. We recognize that changes to established verification processes

may require adjustments to internal workflows. The extended transition period through **February 1, 2027**, is intended to provide additional time to prepare and implement necessary changes.

We appreciate your cooperation and continued partnership. If you have questions or need assistance, please contact Andrew Martin, Public Information Officer - 1-785-296-5062 - andrew.martin@ks.gov.

Thank you for your commitment to public protection, regulatory compliance, and safe nursing practice throughout Kansas.

Sincerely,

Kansas State Board of Nursing
