

Requirements of On-line Undergraduate RN Nursing Programs

1. The curriculum in each RN nursing education program shall include the following:
 - a. Content in the biological, physical, social, and behavioral sciences that provides a foundation for safe and effective nursing practice
 - b. The art and science of nursing
 - c. Didactic content and clinical experience to meet the following objectives or outcomes
 - i. The aspects of a safe, effective care environment, including the management of care, safety, and infection control
 - ii. Health promotion and maintenance, including growth and development through the life span and prevention and early detection of disease
 - iii. Psychosocial integrity, including coping, adaptation and psychosocial adaptation
 - iv. Physiological integrity, including basic care and comfort, pharmacology, parenteral therapies, reduction of risk potential, and physiological adaptation
2. Clinical learning experiences and sites shall be selected to provide learning opportunities necessary to achieve the nursing education program objectives or outcomes
3. The faculty of each nursing education program shall be responsible for student learning and evaluation in the clinical area

Graduates of nursing programs may apply for RN licensure in Kansas (assuming they meet all other qualifications) by doing either of the following:

1. Completing a clinical curriculum that meets the requirements in K.A.R 60-2-104 and 60-2-105 and successfully passing NCLEX RN; or
2. Becoming licensed as a RN in another state and documenting at least 1,000 hours of practice in that capacity, then applying to endorse that license into Kansas.
