

KANNalert

New Free Service Available to Nurse Licensees in Kansas

The Kansas State Board of Nursing is proud to announce a free notification service available to Kansas licensees. Powered by the Kansas company INAlert, KSBN can now send license expiration and emergency notices by text and email from the new "KANNalert" program. Licensees will receive an e-mail or text notice approximately 90, 30 and 10 days prior to their license expiration date.

The KANNalert system complements a growing list of online and automated KSBN services including license renewal, address change and application check. Licensees are encouraged to keep their cell phone number and email address current in KSBN records and can do so by visiting www.ksbn.org and clicking "Online Address Change" on the home page."

The KANNalert service also is available for use in local or statewide emergency notifications, and in the future, licensees will be able to text KSBN to receive current licensing information.

90% of texts are read in the first 3 minutes, 98% in the first hour!

Contacts licensees instantly!

✓ *Notifies licensees about renewals*

✓ *Sends emergency alerts*

✓ *Saves time and postage*
