Over the last five years, smart speakers such as Amazon Alexa and Google Home have changed the way Americans interact with technology. Smart speakers are devices that use voice commands and artificially intelligent virtual assistants to provide hands-free interactions with programmed skills. According to Nielsen’s Media Tech Trender Survey, nearly 25% of American households owned a smart speaker device, with 45% of those households planning to purchase more devices for their home. While the majority of smart speaker users have only recently purchased their devices within the past 12 months, a survey conducted by Adobe projects that up to half of US consumers could own smart speakers before the end of 2018.

In light of these exciting and innovative developments, the Kansas State Board of Nursing (KSBN), in partnership with the Information Network of Kansas (INK), and the Kansas Information Consortium, LLC (KIC) are proud to announce the launch of “Kansas Nursing,” the Kansas Nursing License Verification skill for your Amazon device.

Kansas Nursing is a first-in-class solution that allows users to quickly and easily look up a license, verify the status of an existing license, or find answers to frequently asked questions. The skill was officially debuted at the Sep 10, 2018 KSBN Annual Program Administrators meeting.

“By interacting with Alexa, Amazon’s interactive virtual assistant powered by artificial intelligence, users can access KSBN’s License Verification database via their Amazon Dot, Echo, or Show device. Here are some of the ways you can use the skill:

- Find your nursing license number
- Ask when your nursing license expires
- Learn about CEU requirements to renew
- Look up the status of an existing license

Kansas Nursing is now available in the Amazon app store. For more information, including infographics on how to interact with the skill, visit ksbn.kansas.gov/alexa.”

KSBN is very excited to announce the launch of our Kansas Nursing Alexa skill. We are the first state nursing board in the nation to offer access to our License Verification database and agency FAQs via virtual assistant. We are committed to remaining at the forefront of technology in order to bring the most relevant and informative offerings to those we serve.

Carol Moreland, MSN, RN
Executive Administrator, KSBN

What can you ask Kansas Nursing?

- Alexa, ask Kansas Nursing...
- what my license number is
- when my license expires
- what my CEU requirements are
- how I renew my license
- what my license status is
- to lookup a license
- how long I have to renew my license

### June 2018 Education Committee

The Education Committee met June 12, 2018 and was called to order by Rebecca Sander, MSN, RN, Vice Chair at 8:30 a.m. in Room 509 of the Landon State Office Building. The minutes from March 27, 2018 were approved.

The site visit report from Butler Community College PN Program was reviewed. It was moved to accept the site visit report for Butler Community College PN program with recommendations and to reapprove the program for a period of five years.

The site visit report from Donnelly College PN Program was reviewed. It was moved to accept the site visit report for Donnelly College PN Program with recommendations and to reapprove the PN program for a period of two years with a site visit in 2020.

The following schools presented major curriculum changes:

- Highland Community College LPN to RN Completion Program
- Cloud County Community College ADN Program
- Coffeyville Community College ADN Program
- Emporia State University BSN Program
- Washburn University BSN Program
- Butler Community College PN and ADN Programs
- Donnelly College ADN
- Kansas Practical Nurse Core Educators

Salina Area Technical College requests the approval of an ADN program. It was moved to accept the request from Salina Area Technical College to offer an ADN program with a site visit to occur before approval is given to admit students.

Site visit schedules for 2018 and 2019 were reviewed. Carol Moreland will email committee members requesting assistance with site visits, if needed.

2017 NCLEX RN pass rates were discussed. Two programs, Colby Community College ADN Program and Kansas City Kansas Community College ADN Program, have NCLEX first time pass rates less than 75% for the last three consecutive years. It was the consensus of the Education Committee to conduct focused site visits for these two programs.

Monica Scheibmeir, PhD, APRN, FAANP gave an update on the Military Articulation Initiative.

No petitions for permission to test/retest were reviewed and action taken. The meeting was adjourned at 10:47 am.
June 2018 APRN Committee

The APRN Committee met June 12, 2018 and was called to order by Carol Bragdon, PhD, APRN, Chair at 1:30 pm in Room 509 of the Landon State Office Building. Minutes from March 27, 2018 were approved.

Bobbe Mansfield, DNP, FNP-BC reported on the Prescription Monitoring Program Committee. The Committee compared with other states their criteria on how to identify potential problem users of controlled substances or potential problem prescribers of controlled substances. The focus is on what is the criteria for identifying who these people are and what needs to be done with them in their respective disciplines.

Carol Bragdon reported the Attorney General’s office voiced an opinion there was nothing clear at this point to require certification. Until rules and regulations are revised or legislations regarding the Nurse Practice Act changed we cannot require certification.

Carol Moreland reported that Cara Busenhart and Diane Glynn, KSBN Practice Specialist will be meeting with the Board of Healing Arts to discuss concerns brought forward by the APRN Committee and the Board of Nursing and work on resolutions to be able to move forward the CNM-I draft regulations for approval.

Michelle Knowles, APRN, RN gave an update on the Kansas Advanced Practice Nurses (KAPN) organization. A decision was made at the KAPN meeting in mid-May to proceed forward with a KAPN bill to the Legislature in January 2019. They are working with National Council of State Board of Nursing (NCSBN) and American Association of Nurse Practitioners (AANP) on the draft bill.

It was moved to approve the following out of state schools and their courses:
- College of St. Scholastica – Primary Care Adult/Gero NP
- Herzing University – Family NP
- Union University – Family NP

The meeting was adjourned at 2:24 pm.

Investigative Committee

The Investigative Committee meeting for June 11, 2018 was called to order at 9:00 am. Minutes for the March 2018 meeting were read and approved. The meeting spanned Monday and Tuesday due to scheduling of staff and case review. The Impaired Provider Contract was discussed in anticipation of the RFP process that will be required for the next contract. Further discussion will be had at the September meeting. An executive session was held on Tuesday. Investigative cases were reviewed and disposed of by the Committee members.

Practice Committee

The Practice Committee met on Tuesday June 12, 2018. It was called to order at 3:00 pm. The Committee reviewed and approved the March 2018 minutes. An update was given on the Pharmacy Board regulations pertaining to epinephrine kits to be stocked in schools. Those regulations are still pending completion. Statutes and regulations were reviewed as a regular part of the five-year review process.
Not All Carriers Are Created Equal
A Kansas Newborn Screening Blood Spot Timeliness Initiative

What is Newborn Screening?
Most newborns look perfectly healthy, even the ones with a serious medical condition. They will look and act normal up until they start displaying symptoms that can be irreversible. This is why every baby born in Kansas is screened for 31 different conditions that, if left unidentified and untreated, can cause severe illness, developmental disability, or in some cases death. The Kansas Department of Health and Environment (KDHE) and the Kansas Health and Environment Laboratories (KHEL), in collaboration with birthing facilities and midwives, provide for a series of 3 newborn screens: a hearing screen for hearing loss, a heart screen for critical congenital heart disease (CCHD), and a blood screen for 29 serious and potentially fatal disorders.

The Blood Screen... Do you mean the "PKU" test?
When Newborn Screening began, states only screened for Classic Phenylketonuria (PKU). Therefore, the blood screen was largely referred to as the "PKU test." Now, most states screen for at least 29 of the 35 disorders recommended by the Advisory Committee on Heritable Disorders in Newborns and Children (ACHDNC). It is no longer accurate to refer to the blood spot screen as "the PKU test." When talking to parents or creating internal references, it is a good practice to refer to the screen as the Newborn Screening Dried Blood Spot.

Shipping the Bloodspot Cards Quickly and How it Affects the Screening Process
The national timeliness goal for Newborn Screening is to have the lab results from the blood spot reported out to the Primary Care Provider (PCP) within 5 days of life for time critical results and 7 days of life for all other results. If the baby goes into crisis or develops symptoms before the lab results are completed, then the screening process loses its effectiveness. Therefore, timeliness in the Newborn Screening process is crucial. Every part of the process must work together to certify timely results including measures to ensure that the blood spot be collected between 24 to 48 hours (the closer to 24 hours, the better), sent to the state laboratory in Topeka, KS via overnight courier, processed and then results reported back to the submitting facility and to the PCP. Most of this process is guided by national recommendations or State regulations. These recommendations and regulations outline when to collect, how to collect and how fast the screen needs to travel but this does not control what carrier each facility pays for.

Unfortunately, not all carriers are created equal and Topkea is certainly not an equal distance from every submitting facility in Kansas. For example, if a facility in Western Kansas sends their specimens through the US Postal Service, the specimens head to the predetermined postal facility to be sorted, even though that can often be hours or days in the wrong direction and may even be in a different state. This can put the child at a deadly risk. The conditions screened for in Kansas include 17 time-critical disorders which can cause symptoms within the first week of life. If the specimen does not arrive to the laboratory within 3 to 4 days from birth, it is very difficult to begin testing and provide results within the timeliness goal.

The Timeliness Initiative:
In August 2017, Kansas Newborn Screening Program implemented a timeliness initiative to determine if utilizing overnight transport would decrease the transit time for facilities and what impact this change in transit time would have on the overall goal of reporting within 7 days. For selected facilities, the Kansas Newborn Screening Program used grant funds to cover overnight UPS shipments of specimens for a few select facilities. In the time that this initiative has occurred the program has learned some valuable lessons that need to be passed on:

Lesson 1: Start the process off right! The closer to 24 hours to collect, the better. Thus far, the initiative has reemphasized the importance of collecting on time. If the facility is not collecting on time, improving transit time only tackles part of the problem. It is important to make sure your facility is hitting the mark at every step in order to achieve the overall goal of reporting time critical results in 5 days and all other results in 7 days.

Lesson 2: Working for the weekend! A major barrier across the board is a miscommunication around Saturday pickups. When working with carriers, it is crucial to involve them in the importance of their part in the Newborn Screening Process. If a specimen just misses the Friday pick up and there is no Saturday pickup, then most often it waits until Monday. This creates a major lag in the process. When looking into possible carriers make sure expectations and needs are clear for your facility and that weekend pickup processes are put into place if necessary.

Lesson 3: Explore each option! This initiative did largely improve the transit time for some, like Hospital E shown below, but not all participating facilities showed improvement. This goes to show that UPS is not a "one solution solves all" option. Each facility should look into their specific internal barriers for timeliness and subsequently identify solutions to those barriers.

Newborn Screening Timeliness Checklist: What You Can Do to Improve the Process
✓ Is your facility collecting close to 24 hours for most of your specimens?
✓ Does your facility have a carrier log? Having a carrier log for each specimen to include where and for how long the specimen dries, when and where it is packaged and then it’s picked up from your facility. This can help identify where a delay in Newborn Screening may be happening within your facility.
✓ Be informed, Be an advocate!
✓ Do you know what carrier your facility utilizes? If not, find out!

The Kansas State Board of Pharmacy (Board), in conjunction with the Kansas Department of Health and Environment (KDHE), is pleased to announce a new partnership with Appriss Health to provide interoperability services for all prescribers and pharmacists in Kansas to access K-TRACS, the Kansas Prescription Drug Monitoring Program, through the PDMP Gateway. “This is an opportunity for Kansas to deliver a more efficient and patient-oriented prescription drug monitoring program,” said KDHE Secretary Susan Mosier, MD, MBA, FACS. “Integrating a patient’s controlled substance prescription data into the electronic health record helps providers treat that patient.”

The project is funded by a grant from the Centers for Disease Control awarded to the Kansas Department of Health and Environment. “Grant funds will support Gateway connection costs for each Kansas electronic health records and pharmacy management system approved for integration,” said Board Executive Secretary Alexandra Blasi. “This multiagency collaboration furthers the K-TRACS mission to prevent diversion, misuse and abuse of controlled substances in Kansas, while protecting legitimate medical use.”

The Board successfully piloted electronic medical records integration a few years ago, enabling a single sign-on for access to a patient’s medical record and prescription history. The Board will begin to model this integration statewide which will increase availability, ease of access, and use of a patient’s controlled substance prescription history for making critical and informed prescribing decisions. Currently, prescribers and pharmacists log in to separate systems to query patient data which takes valuable time away from patient care and interaction. This integration simplifies the process by creating a one-stop-shop, making K-TRACS data directly available in the patient’s electronic record.

For more information and to request integration, please visit http://pharmacy.ks.gov/k-tracs/k-tracs-statewide-integration. Integrations must be approved by the Board and will require reporting to the Board regarding such connections.

What is KNAP?
KNAP is a professional assistance program designed to assist all nurses and mental health technicians who have a problem or illness that has or could impair their ability to practice safely.

The Goal of KNAP
Mental and physical illness, including alcohol and other drug addiction, can potentially impair practice and health. We estimate that at any given time, approximately 10% of the population is affected. This same percentage is thought to be true of healthcare professionals. Alcohol and other drug addiction, as well as mental and physical illnesses, are treatable. KNAP works with the program participants to obtain an evaluation, treatment (if indicated), and monitoring throughout the recovery process.

Referrals
Self-referrals to the program are encouraged, but referrals may be made by a family member, a friend, employer or anyone concerned about the nurse/LMHT. Anonymous referrals are not accepted. A person may call for information or advice without giving their name, however. Referrals may be made by calling 913-236-7575.

KNAP Providers
- Confidential services to Kansas RNs, LPNs, and LMHTs experiencing problems and illnesses which could lead to impaired practice.
- Interventions, assessments, referrals for evaluation and treatment (if indicated.)
- On-going monitoring through random urine drug screens, contact with employers and monthly groups.

Causes for Concern

Job Function
- Narcotics discrepancies, e.g.: incorrect counts, alteration of narcotic containers, increased patient reports of ineffective pain control, discrepancies on records or frequent corrections of records, unusual amounts of narcotics wasted, significant variations in the quantity of narcotics ordered for technician’s unit or shift.
- Fluctuations in the quality of work performance.
- Irresponsible behavior from someone previously conscientious and responsible.
- Requests to work shifts that are the least supervised.

Behavior
- Increasing isolation from colleagues, friends and family and avoiding social activities.
- Complaints from others about work performance or alcohol or drug use.
- Mood swings, irritability or depression, or suicide threats or attempts, perhaps caused by accidental overdose.

Physical Symptoms
- Obvious intoxication such as swaying, staggering or slurred speech.
- Odor of alcohol on breath or the excessive use of breath-fresheners or perfume to disguise the odor of alcohol.

KNAP is supported by funds from the Board of Nursing and, in small part, by fees charged to the participants.

### Kansas State Board of Nursing Joins Nursys

We are pleased to announce that verifications of licensure to another state will now be achieved by a more secure and electronic process! Beginning May 12, 2017 this process will facilitate the turnaround for licensure verification to be sent to a state of your choice via Nursys.

**Nursys** is the only national database for licensure verification for registered nurses (RNs), licensed practical/vocational nurses (LPNs) and advanced practice registered nurses (APRNs). Nursys® is designated as a primary source equivalent database through a written agreement with participating boards of nursing. Nursys® is live and dynamic, and all updates to the system are reflected immediately, pushed directly from participating board of nursing databases through frequent, secured data updates. Nursys®, a 24/7 nationwide database for verification of nurse licensure and discipline, will make licensure verification immediately available to the board of nursing where an individual is applying for licensure.
