Positions Open for Appointment to the Kansas State Board of Nursing

The Kansas State Board of Nursing will have three positions open for appointment July 1, 2015. Governor Brownback will be seeking nominations for one Registered Nurse position, one Licensed Practical Nurse, and one Public Member position. The RN open position consist of a Registered Nurse from nursing practice, nursing education, or who is engaged in the advanced practice registered nurse role. Both the Registered Nurse and Licensed Practice Nurse must have five years’ experience in nursing and shall be actively engaged in the profession of nursing.

Those interested in one of the positions is encouraged to complete the online form at https://governor.ks.gov/contact-the-governor/contact-governor/K.S.A. 74-1106 requires Kansas State Nurse Association to give the Governor a list of Registered Nurses to be considered for appointment. The Governor is not obligated to make his appointment from the recommendations, although they will be considered.

To see the statute discussed above log onto the web site at www.ksbn.org and download it at no charge.

Dr. Nancy Mosbaek Scholarship Winner

Brandon Bailey is the winner of the Dr. Nancy Mosbaek scholarship. He is attending the University of Kansas pursing a doctorate degree in nursing with an emphasis on nursing education. He plans to teach at Fort Hays State University after completing his DNP.

Happy National Nurses Week 2015!
The Unique Contribution of Nursing to Healthcare

Holly Dawson

Nursing uniquely contributes to healthcare with its ability to strengthen, grow, and evolve professional practices in the constantly changing field of healthcare. Nurses adapt in order to become the appropriate resource at any given moment. Equipped with an arsenal of skills, nurses are life-savers, educators, advocates, information gatherers, and comfort providers. While helping people is the overall goal, nursing is a unique, multifaceted profession focusing on all aspects of patient care.

The Civil War set the stage for the modern nursing profession. Before the war, nurses were typically poorly trained, unsupervised and provided in-home (non-professional) care. Although hospitals were around before the war, they were not utilized, and were viewed by the public as poor-houses rather than a place you go for care. The efforts and contributions nurses made in the war by aiding soldiers changed the history of nursing in America forever. For example, Sally Tompkins was a nurse on the Confederate side. After being asked to care for wounded soldiers, she took the initiative to transform a friend’s mansion into “Robertson Hospital.” Even though germ theory was not understood at this time, Sally maintained a strict code of cleanliness in the hospital, which was staffed by only Sally and six other women. Although the facility was staffed, the hospital treated over one thousand people and had a 94% survival rate. After the war nursing was no longer seen as a low level role, but as a respectable career.

The contributions nurses made during the war was seen as a low level role, but as a respectable career. Nursing uniquely contributes to healthcare needs. These are unique contributions.

Nicole Martin

It is hard to escape the care of a nurse. From the watchful eye of a school nurse to the quick thinking of an emergency room nurse and from the sound advice of a home health nurse to the advocacy of a public health nurse, nurses are watching out for us our entire lives. In the United States no other healthcare profession even comes close to our sheer numbers; registered nurses are now over 3 million strong (Health Resources and Services Administration, 2010). Perhaps it is our ubiquitous nature that has placed us in a very unique position of responsibility: nurses consistently rank as most trusted of all professions (Robert Wood Johnson Foundation, 2014). According to Gallup® polling, last year 82% of Americans cited nurses for excellence in “honesty and ethical standards,” more than twelve percentage points ahead of the second ranked profession (Gallup®, 2013). In fact, “nurses have topped the list since Gallup® began asking about them in 1999, with the exception of 2001, when Gallup included firefighters in the aftermath of the September 11 attacks (Robert Wood Johnson Foundation, 2014)” ...a very fair concession to make indeed. So how do we as nurses continue to earn the public trust year after year? What exactly are we bringing to the table that is unique? The scope of a nurse is by definition, broad, and we are in the difficult and enviable position of trying to distill its essence. The unique contribution of nursing to healthcare can be explained by two factors: its predominant leadership style and the specific nature of nursing care that is not replicated by other professions.

The predominant leadership style among nurses is something called servant leadership. Servant leaders prioritize building relationships, think before they act, and listen without forming judgments (Greenleaf, 2002; Neill & Saunders, 2008). The servant leader inspires followers because he or she is able to provide direction without resorting to barking orders. Few other professions attract people who can strike this delicate balance quite like nursing. One easy to understand example of servant leadership is found in the teachings of Jesus of Nazareth, which are deeply intertwined with the history of nursing and the creation of the first hospitals in the Western world. The root of all decision-making of a servant-leader nurse could be summarized as: It’s not about me. It’s about the patient. Nursing is a rewarding profession focusing on all aspects of patient care.

career in every sense of the word, but nurses generally give more than they take, and this builds trust among their patients and the general public.

Caring, healing, skillful, courageous, skilled communicator, advocate .... these are attributes often used to describe nurses and the nature of the care they provide. But let us be honest, many of our inter-professional colleagues in healthcare exemplify these traits as well. Three aspects of nursing care that apply to both practical and professional nurses and distinguish nurses from other healthcare providers are: anticipatory, continuous, and patient-centered. First, anticipatory care recognizes a potential problem before it occurs. It assesses a patient's vulnerabilities and plans ahead in order to prevent complications. Anticipatory care comes in many forms such as safety, prevention, checklists, infection control, early intervention, and primary care, to name a few. The mindset of a nurse is: What's the worst that could happen and am I prepared for it? Second, continuous care refers to round-the-clock nursing presence. In the inpatient or residential setting, a "patient assignment" means something completely different to a nurse than it does to other professionals. For the nurse, accepting a patient assignment means taking the patient's safety, wellbeing, therapeutic progress, and even life into his or her hands while on duty. There simply is no such thing as a hospital without nurses. To drive the point home, nurses still make home visits and nurses can be reached on the phone, two crucial aspects of continuous care for our aging population. Third, patient-centered care means respecting the patient as the driver of his or her healthcare decisions and working to empower patients to view themselves in this manner. Patient-centered care is a new concept for the American healthcare system at large but an old concept for nurses. It is the radical view that the most important information lies with the patient, not with the physician or with the nurse, and that the patient's goal is our goal. A patient-centered perspective puts nursing ahead of the curve in terms of upcoming changes in healthcare (Institute of Medicine, 2011) and is surely relevant to our standing in the Gallup® polls.

In summary, nursing offers a unique leadership style and a unique skills set. But we must look to the future and ask ourselves how we can apply these skills to meet the needs of twenty-first century Kansas. Nurses have a responsibility as the most trusted of all professions. Earlier this year the Mayo Clinic called our current healthcare system "broken and unsustainable" and called for servant leadership in order to "regain public trust" (Trastek, Hamilton, & Niles, 2014). This certainly sounds like a call to nurses! If the healthcare system is going to shift from a reactive, disease-management approach to a proactive, health-promotion mindset, nurses must lead the way, starting with ourselves, our families, our co-workers, our churches, and our patients. As the profession charged with health promotion and illness prevention, the fate of the general population and the fate of nursing go hand in hand. What will be our future unique contribution to healthcare? Will we fulfill the need for value-based primary care? Will we make our hospitals safer? Will we eliminate disparities in access to care? Will we see the United States join the ranks of the healthiest nations of the world? There truly is so much work to be done. And the question is not will Kansas nurses shape the future, but how.

The Unique Contribution of Nursing to Healthcare

Emily Nohr

“Nursing encompasses an art, a humanistic orientation, a feeling for the value of an individual and an intuitive set of ethics, and of the appropriateness of action taken.”

- Myrtle Aydelotte, 1992

Every patient emerges with their own unique history and individual set of biological, psychosocial, spiritual, and cultural needs. Throughout the ages, nurses have been challenged with the dual role of artist and scientist, experts of both “soft” and “hard” skills with which to help each patient. And as patients, we expect our nurses to be nurturing, intuitive healers, as well as skilled technicians drawing from evidence-based practice. Our Lady of the Lamp, Florence Nightingale, deemed nursing the “finest of the Fine Arts” requiring “an exclusive devotion, as hard a preparation as any painter’s or sculptor’s work.” But also called the “passionate statistician,” Nightingale placed top priority on results. So we see the boundaries between art and science blur in this unique role, creating a nurse hybrid of sorts.

When I was four or five, I pored through my mom’s illustrated medical books from her time in nursing school. My favorite book of hers held layers of glossy see-through acetate pages. Each of these overlays portrayed a different system of the body in intense color and detail, together overlapping to create a complete visual of the human body. As a child, I turned those pages countless times, and the layers started coming to life for me as I “built” this masterpiece each time. And I was endlessly fascinated with the interplay of colors, forms, balance, symmetry, and harmony that I saw. Much later on, I learned the art of physiology, of how this visually wondrous body works, breathes, moves, grows, reproduces. Now, I’m coming to realize that the science of nursing is what I learn on the pages, and the art of nursing is what I must find in between those pages. The immeasurable skills of reading your patient’s expression, of knowing when to follow your intuition, of gaining your patient’s trust: the art of nursing is inherent in these skills and in so many more.

As an LPN student, I grow daily in my understanding of nursing as a science. The human body is redefined to me as the most complex and brilliant machine ever created. My instructors, each with years of nursing experience, reveal the biological secrets each body holds. I learn about the independently functioning universe inside us that strives for perfect balance in all its systems. In lab, my classmates and I objectify, quantify, and document. Proven evidence, research, and lab data form the scientific base of my nursing education. Building from this solid base enables the nurse to ask: What information do I have to support my plan of care? Based on the numbers and test results, can I anticipate my patient’s needs?

Nursing could not be a viable discipline without both science and art, for one is not enough without the other. And together, art and science form so much more than just the sum of their parts. Both must work synergistically for the nurse, because his or her canvas isn’t static. It moves and breathes, hopes and grows, thinks and cries. As nurses, we are challenged to synthesize the patient’s subjective information with the objective to create the best possible plan of care. Just as each canvas, each patient, needs to achieve balance in all their systems, so does our scientist/artist: the nurse.
The Unique Contribution of Nursing to Healthcare

Ashtyn Shepard

The doctor walking down the hall is tired and overworked and he has just broken the news to a 24 year old mother of two that the cancer is not responding to treatment. That same mother is sitting in her hospital room watching the clock and grieving the loss of all the memories she has not even been able to make yet. The nurse that just started her shift is me. I’m depressed, on the brink of divorce and wondering how I’m going to make it through this 12 hour shift when my entire world is falling apart. All three of us have one thing in common; we need support. I believe that the most unique contribution of nursing to health care is the support that nurses give doctors, patients, and fellow nurses.

Nurses provide support to doctors by being knowledgeable, skilled and understanding. If doctors know that they can depend on the knowledge and skills of the nurses, it allows them to focus more on their primary concerns. Understanding between doctors and nurses allows for grace and patience, which are both great stress reducers. There is a wonderful amount of freedom that comes when people know that they can count on those around them. Doctors need to know that they have the support of their nurses.

Nurses provide support to patients by being available, empathetic and willing to listen. As nurses we are an important source of comfort and reassurance for our patients. We can never be too busy for them; they are our priority. Their overall well-being includes not only their physical condition but also their mental, emotional, and psychological health. By being available to them when they need us, empathetic to their circumstances, and willing to listen to what they have to say, we can change their life. Patients need to know that they have the support of their nurses.

Nurses provide support to fellow nurses by encouraging each other, working well together, and remembering that we are all human. It is inevitable that we will all have a bad day or even a bad season in our lives. When we encourage each other and keep a healthy perspective it helps not only us, but everyone we work with. Nursing is one of the most demanding careers available. If, as nurses, we are going to be truly successful, we must band together. Nurses need to know that they have the support of their fellow nurses.

When difficult times come and the doctor needs a helping hand, the dying woman needs our love, and the worn out coworker needs our encouragement, we need to be that support. I am that support, and I need that same support in return. When every person is fulfilling his or her role, the doctors, the patients, and the nurses all benefit. As a nurse I commit to providing that unique contribution of nursing to health care by giving doctors, patients, and fellow nurses the support that they need.
The Investigative Committee met on Monday and Tuesday September 15 and 16. The Committee reviewed cases for disposition using the new procedure mandated by the Attorney General’s office. A letter of concern from a licensee was shared with the committee. It focused on the need to protect the public and profession by taking a more firm stand/disposition for violations of the KNPA. The KNAP annual report was reviewed. Review of the LMHT Act and language focusing on behavioral health is continuing forward to the December meeting. Two statutes were reviewed as part of the 5 year legislative review process. The NCSBN Competency Study was discussed and no changes were suggested by the Committee.

The September Finance Committee was called to order September 17, 2014 at 8:30 a.m. in room 560 of the Landon State Office Building in Topeka by Bernard Becker, Chair. The minutes of the June 18, 2014 Finance Committee were approved as written. K.A.R. was reviewed and it was moved to increase the application fee for approval of a new nursing school to $1,000 and increase the fee of single continuing nursing education offering to $100.

The KSBN articles were reviewed and the following changes were recommended.

Article VII –Committees: Section 1e remove “and committee chair” and Section 5 Finance-add paragraphs c and d about Fee Fund Guidelines and Policy. It was consensus of the committee to take these changes to the full Board for approval.

M. Blubaugh reported that the agency was $22,000 under budget. She also reported that the rent for the Data Center that is paid to the Department of Administration is being raised and the amount will be around $19,899 more than FY 14. In FY 16 and FY 17 fees being charged to the agency for rent and other state services are being raised again and the amount will be around $71,638 (FY16) and $73,700 (FY17) more than FY 15. The committee discussed that the renewal fees that was just lowered in July 2014 will need to be reviewed and may need to be raised. It was the consensus of the committee for M. Blubaugh to get approval from the full Board to draft a letter of concern about the raising of some of the fees being charge to the agency for fiscal years 15, 16, and 17.

A. Guerrero reported that the state wide contract with KS.Gov was reviewed and the fee was lowered to 2.5% per transaction. This fee will be lower than the $2.50 flat fee that is being charged now. This will lower the fees charged to our licensees when renewing online. KORA fees for information requests for nurse information were discussed. It was decided to raise the electronic mail fee from $27 to $50 and removing the option for the request of mailing labels or printed paper list.

The meeting adjourned at 9:13 A.M.

The September 2014 Education Committee met September 16, 2014 and was called to order by Brenda Moffitt, APRN, CNS-BC, V-Chair at 8:30 a.m. in Room 509 of the Landon State Office Building. A certificate of appreciation for his time served on the Education Committee was presented to David, Martin, RN, MN. The minutes from June 17, 2014, 2014 were approved. The Education Specialist report was given by Carol Moreland, MSN, RN.

Larned State Hospital and Barton Community College requested application for the approval of a Mental Health Technician Certificate Program. It was moved to accept the application for the approval of the program with a site visit to occur before approval is given to admit students.

The following schools presented major curriculum changes:
- Johnson County Community College PN Program
- Hesston College ADN Program
- University of St. Mary BSN Program
- Hutchinson Community College PN Program
- Washburn University School of Nursing DNP Program

The 2014 Nursing Program Annual Report Data was reviewed. It was moved to reapprove the PN, ADN and BSN programs through December 2015. It was moved to reapprove the graduate nursing programs through December 2016. Nine petitions for permission to test/retest were reviewed and action taken.

The meeting was adjourned at 10:31 am.

The September Finance Committee was called to order September 17, 2014 at 8:30 a.m. in room 560 of the Landon State Office Building in Topeka by Bernard Becker, Chair. The minutes of the June 18, 2014 Finance Committee were approved as written. K.A.R. was reviewed and it was moved to increase the application fee for approval of a new nursing school to $1,000 and increase the fee of single continuing nursing education offering to $100.

The KSBN articles were reviewed and the following changes were recommended.

It was decided to raise the electronic mail fee from $27 to $50 and removing the option for the request of mailing labels or printed paper list.

The meeting adjourned at 9:13 A.M.
### September 2014 APRN Committee

The APRN Committee met September 16, 2014 and was called to order by Brenda Moffitt, CNS, APRN, Chair at 1:30 pm in Room 509 of the Landon State Office Building. The minutes from June 16, 2014 were approved.

It was moved to approve the following out of state schools and their courses:
- Arizona State University – Adult Gerontology Nurse Practitioner
- Bryan College of Health Sciences School of Nursing Anesthesia – Nurse Anesthesia
- Creighton University – Family Nurse Practitioner
- Frank J. Tometta School of Anesthesia – Nurse Anesthesia
- Georgetown University – Nurse Midwifery/ Women’s Health Nurse Practitioner
- Medical College of Virginia – Nurse Anesthesia
- Quinnipiac University – Family Nurse Practitioner
- Regis University – Family Nurse Practitioner
- Rush University – Pediatric Nurse Practitioner
- Texas Wesleyan University – Nurse Anesthesia
- Truman Medical Center School of Nurse Anesthesia – Nurse Anesthesia
- University of Massachusetts Worcester – Adult Gerontology Acute Care Nurse Practitioner
- University of Missouri-Columbia – Pediatric Nurse Practitioner
- University of North Carolina – Charlotte – Nurse Anesthesia
- University of North Florida – Nurse Anesthesia
- University of South Carolina School of Medicine – Nurse Anesthesia
- Vanderbilt University – Adult/Gerontology Acute Care Nurse Practitioner, Family Nurse Practitioner & Psychiatric Mental Health Nurse Practitioner

Charles Wheelen, HCSF Executive Director discussed the Kansas Care Stabilization Fund and the Enactment of House Bill 2516. HB 2516 adds nurse-midwives to the list of health care providers who are required to obtain professional liability insurance coverage and participate in the Kansas Health Care Stabilization Fund. An affidavit can be obtained for those nurse-midwives who have the intent of not rendering professional APRN services.

The meeting was adjourned at 2:10 pm.

### September CNE Committee

The September CNE Committee was called to order September 18, 2014 at 8:35 a.m. in room 560 of the Landon State Office Building in Topeka by Judy Hiner, Chair. The review of K.A.R. 60-4-103 was removed from the agenda as it was reviewed in March 2014. The minutes from the June 2014 meeting were approved as distributed.

D. Glynn reported there were 164 (4109 hours) IOA’s denied for the month of July and 109 (3431 hours) IOA’s denied for the months of August. IOA’s were denied for being incomplete, no certificates included and no agendas.

The following long term provider applications were approved:
- Johnson County Community College
- Olathe Medical Center
- Kansas Coalition Against Sexual and Domestic Violence
- Prairie View, Inc application was denied and the revisions requested will be reviewed at the December meeting.

The meeting was adjourned at 9:30 a.m.

### Practice Committee

The Practice Committee met on Tuesday September 16. The second meeting of the multidisciplinary committee reviewing the Joint Policy Statement on the Use of Controlled Substances was attended by Brenda Moffitt and Diane Glynn. An updated statement Draft is being prepared and will be reviewed at a third meeting. A review of Kansas Administrative Regulations 60-15-103 and 104 was performed and no changes were suggested. The Community Paramedic discussion began and will be continued into the December meeting. The task force working on the update of the IV Therapy Exam Question Pool and study the need for a live stick in the competency check has begun the study process. A standardized form for use by the IV therapy providers in reporting course results was reviewed and approved. Chris Tuck received a certificate and thank you for her service to the committee over these past several years.

The meeting was adjourned at 2:10 pm.

National Transportation Safety Board Recommendation

The National Transportation Safety Board (NTSB) is an independent federal agency that investigates every civil aviation accident in the United States and significant accidents in other modes of transportation. They determine the probable cause of accidents and issue safety recommendations aimed at preventing future accidents. On September 9, 2014 they adopted, Drug Use Trends in Aviation: Assessing the Risk of Pilot Impairment. Information about this topic and recommendations may be found at their website http://www.ntsb.gov under report number SS-14/01. The NTSB has asked that KSBN publish the following informational article to highlight the importance of licensed health care providers to routinely discuss with their patients the effect their diagnosed medical conditions or recommended drugs may have on their ability to safely operate a vehicle in any mode of transportation.

Evidence That Pilots Are Increasingly Using Over-the-Counter, Prescription, and Illicit Drugs

The National Transportation Safety Board (NTSB) recently analyzed toxicology tests from 6,677 pilots who died in a total of 6,597 aviation accidents between 1990 and 2012. The results demonstrate a significant increase in the use of a variety of potentially impairing drugs.

The study found significantly increasing trends in pilots’ use of all drugs, potentially impairing drugs (those with a US Food and Drug Administration warning about sedation or behavior changes in routine use), controlled substances, and illicit drugs (those defined as Schedule I by the US Drug Enforcement Administration). The final report, Drug Use Trends in Aviation: Assessing the Risk of Pilot Impairment, is available on the NTSB’s Safety Studies web page under report number SS-14/01.

In this study, the pilot was considered to be positive for a drug if it could be qualitatively or quantitatively identified in blood or tissue; drugs identified only in urine or used as part of resuscitative efforts were excluded.

Overall, 98% of the study pilots were male and 96% were flying privately rather than for commercial purposes. The average age of study pilots increased from 46 to 57 years over the study period.

Over the course of the study, for fatally injured pilots, the following was found:

The proportion of pilots testing positive for at least one drug increased from 10% to 40%.

More than 20% of all pilots from 2008-2012 were positive for a potentially impairing drug, and 6% of all pilots were positive for more than one potentially impairing drug.

Overall, the most common potentially impairing drug pilots had used was diphenhydramine, a sedating antihistamine (the active ingredient in many Senadryl and Unisom products).

During the most recent 5 years studied, 8% of all pilots tested positive for controlled substances; hydrocodone and diazepam each accounted for 20% of the positive findings.

The percentage of pilots testing positive for marijuana use increased to about 3% during the study period, mostly in the last 10 years.

The large increase in the proportion of fatally injured pilots with evidence of potentially impairing drugs suggests an increasing risk of impairment in general aviation. Aviation is the only transportation mode in which a fatally injured operator (pilot) routinely undergoes extensive toxicology testing; no similar testing is routinely performed for fatally injured operators of boats, trains, trucks, or cars. Given the general increase in drug use in the population, it is likely that there has been a similar trend in drug use among operators across all modes of transportation.

THE CONDUCT OF BOARD MEETINGS

1. Kansas State Board of Nursing meetings are open to the public.
2. Executive sessions and the Investigative Committee meetings are closed to the public.
3. The President will call for the Executive Session citing a specific purpose, length of time and who is included.
4. The Board meeting follows a prepared agenda.
5. Visitors and/or guests do not actively participate in the formal meeting but may be recognized by the President of the Board for additional information or questions.
6. Whenever possible, all meetings will be called to order on time and will follow the prepared agenda.
7. Members of the Board, Board committee members, and the Board staff shall be recognized by the President.
8. Only one person will speak at a time.
9. Members of the Board will speak in an orderly fashion and refrain from conversation when another member is speaking.
10. Guests/visitors will be recognized only at the discretion of the President.
11. Persons in attendance at meetings are respectfully requested to refrain from talking or making noises while the meeting is in progress.
12. Anyone disrupting the meeting will be asked to leave.
13. Meetings will be adjourned as scheduled or upon completion of business, or; continued only upon the consensus of the membership of the group.
14. The President may establish and announce additional guidelines for the meeting subject to the agreement of the other Board members.
15. The President is responsible for the conduct of the meeting and will enforce the rules of conduct.

THE CONDUCT OF COMMITTEE MEETINGS

1. Kansas State Board of Nursing Committee meetings are open to the public.
2. Executive sessions and the Investigative Committee meetings are closed to the public.
3. The Committee Chair will call for the Executive Session citing a specific purpose, length of time and who is included.
4. The Committee meeting follows a prepared agenda.
5. Visitors and/or guests do not actively participate in the formal meeting but may be recognized by the committee chair for additional information or questions.
6. Whenever possible, all meetings will be called to order on time and will follow the prepared agenda.
7. Members of the Committee, Board members, and the Board staff shall be recognized by the Committee Chair.
8. Only one person will speak at a time.
9. Members of the Committee will speak in an orderly fashion and refrain from conversation when another member is speaking.
10. Guests/visitors will be recognized only at the discretion of the Committee Chair.
11. Persons in attendance at meetings are respectfully requested to refrain from talking or making noises while the meeting is in progress.
12. Anyone disrupting the meeting will be asked to leave.
13. Meetings will be adjourned as scheduled or upon completion of business, or; continued only upon the consensus of the membership of the group.
14. The Committee Chair may establish and announce additional guidelines for the meeting subject to the agreement of the other Committee members.
15. The Committee Chair is responsible for the conduct of the meeting and will enforce the rules of conduct.
What is KNAP?

KNAP is a professional assistance program designed to assist all nurses and mental health technicians who have a problem or illness that has or could impair their ability to practice safely.

The Goal of KNAP

Mental and physical illness, including alcohol and other drug addiction, can potentially impair practice and health. We estimate that at any given time, approximately 10% of the population is affected. This same percentage is thought to be true of healthcare professionals.

Alcohol and other drug addiction, as well as mental and physical illnesses, are treatable. KNAP works with the program participants to obtain an evaluation, treatment (if indicated), and monitoring throughout the recovery process.

Referrals

Self-referrals to the program are encouraged, but referrals may be made by a family member, a friend, employer or anyone concerned about the nurse/LMHT.

Anonymous referrals are not accepted. A person may call for information or advice without giving their name, however. Referrals may be made by calling 913-236-7575.

KNAP Providers

- Confidential services to Kansas RNs, LPNs, and LMHTs experiencing problems and illnesses which could lead to impaired practice.
- Interventions, assessments, referrals for evaluation and treatment (if indicated).
- On-going monitoring through random urine drug screens, contact with employers and monthly groups.

Causes for Concern

Job Function

- Narcotics discrepancies, e.g.: incorrect counts, alteration of narcotic containers, increased patient reports of ineffective pain control, discrepancies on records or frequent corrections of records, unusual amounts of narcotics wasted, significant variations in the quantity of narcotics ordered for technician's unit or shift.
- Fluctuations in the quality of work performance.
- Irresponsible behavior from someone previously conscientious and responsible.
- Requests to work shifts that are the least supervised.
- Inordinate interest in patients' pain control medications.

Behavior

- Increasing isolation from colleagues, friends and family and avoiding social activities.
- Complaints from others about work performance or alcohol or drug use.
- Mood swings, irritability or depression, or suicide threats or attempts, perhaps caused by accidental overdose.

Physical Symptoms

- Obvious intoxication such as swaying, staggering or slurred speech.
- Odor of alcohol on breath or the excessive use of breath-fresheners or perfume to disguise the odor of alcohol.

KNAP is supported by funds from the Board of Nursing and, in small part, by fees charged to the participants.
