Diane Glynn, JD, RN, was inducted as a 2018 Washburn University Alumni Fellow. The Washburn University Alumni Fellows program is a prestigious recognition of those alumni who have distinguished themselves in their careers. Diane has been the Kansas State Board of Nursing Practice Specialist since 1991. In that role she advises nurses and health care businesses on what is allowed in nursing practice. She also collaborates with the Board to oversee the investigation of nurses and others in violation of the Kansas Nurse Practice Act. She was a registered nurse at Stormont Vail Health for 10 years, including while earning her law degree at Washburn.

Her law career includes work in her own private practice, an associate attorney and an assistant attorney general. She is a guest lecturer for the Washburn School of Nursing and was an adjunct professor in the criminal justice and legal studies program. Diane has been a dedicated nursing regulator. Diane retired on December 14, 2018 from her role as Practice Specialist. The Kansas State Board of Nursing extends their congratulations and deep appreciation for her loyal service for more than 27 years to the Kansas State Board of Nursing and the citizens of Kansas. We wish her a happy retirement.

KSBN COMMITTEE REPORTS

September 2018 Education Committee

The Education Committee met September 11, 2018 and was called to order by Rebecca Sander, MSN, RN, Vice Chair at 8:30 a.m. in Room 509 of the Landon State Office Building. The minutes from June 12, 2018 were approved.

The site visit report from Salina Area Technical College (SATC) ADN Program was reviewed. It was moved to accept the site visit report for SATC ADN program with recommendations and to approve the program to admit up to 32 students each academic year beginning in August 2019 with a site visit to occur after the first graduation.

The following schools presented major curriculum changes:
- Highland Community College ADN Program (3)
- Rasmussen College ADN and BSN Programs
- Baker University BSN Program
- Kansas Practical Nurse Core Educators

Flint Hills Technical College requests the approval of an ADN program. It was moved to accept the request from Flint Hills Technical College to offer a ADN program with a site visit to occur before approval is given to admit students.

MidAmerica Nazarene University requested approval for an Adult Gerontology Primary Care NP Program. It was moved to accept the request from MidAmerica Nazarene University to offer an Adult Gerontology Primary Care NP program with a site visit to occur before approval is given to admit students.

Annual Report was reviewed. It was moved to reapprove the PN, ADN, and BSN programs on full approval status through December 2019. It was moved to reapprove the conditional approval status of Pratt Community College ADN Program and Kansas Wesleyan University BSN Program through December 2019.

There will be four scholarships in the amount of $1000.00 each given as in previous years. The Education Committee by consensus agreed to change the Program and Kansas Wesleyan University BSN Program through December 2019.

Sites visited for reapproval of conditional approval status are listed.

The Education Committee, data from nursing programs who want to bring military in each academic year beginning in August 2019 with a site visit to occur after the first graduation.

September 2018 APRN Committee

The APRN Committee was called to order by Carol Bragdon, PhD, APRN, Chair on September 11, 2018 at 1:30 pm in Room 509 of the Landon State Office Building. Minutes from June 12, 2018 were approved.

Carol Bragdon presented Cara Busenhart, PhD, CNM, APRN with a certificate of appreciation for her time served on the APRN Committee.

Bobbie Mansfield, DNP, FNP-BC reported on the Prescription Monitoring Program Committee. Funding continues to be an issue as PMP is the wave of the future nationwide. There has been discussion on creating data that would be meaningful for guiding practice on three levels: 1) recognizing patients who may be having outlining behavior and what to do about it; 2) prescribers who may be performing outside of guidelines; 3) media impact with reality and hype concerning the opioid epidemic. Committee meetings have included a KBI representative to discuss what to do if a patient is referred.

Cara Busenhart, PhD, CNM, APRN reported on the Nurse Midwifery Council. It was decided that Tucker, Poling, General Counsel, Kansas State Board of Healing Arts, would bring the BOHA CNM-I Regulations to the APRN Committee and the full Board for approval. The consensus of the APRN Committee is to conduct a roll call vote of the BOHA CNM-I Regulations at the September 12, 2018 Board meeting.

It was moved to approve the following out of state schools and their courses as meeting the board’s criteria:
- Binghamton University – Community Health NP
- Louisiana State University Health Sciences Center at New Orleans - RNA
- Spring Arbor University – Family NP
- Michelle Knowles, APRN, RN gave an update on the Kansas Advanced Practice Nurses (KAPN) organization. After working with AANP (American Association of Nurse Practitioners) and NCSBN (National Council of State Boards of Nursing) and their recommendations on language they plan to develop a bill for 2019. They have been working on putting in a working description or definition of what an APRN role is, based on the APRN Consensus Model, how to require national certification and malpractice and removal of written protocol authorization by a responsible physician language.

The meeting was adjourned at 2:36 pm.

Practice Committee

The September 2018 Practice IV Therapy Advisory Committee was called to order at 3:00 p.m. in room 1051 of the Landon State Office Building in Topeka by M. Struble, Chair. A plaque was presented to Julie Putnam for her contributions to the Committee. The minutes from the June 2018 meeting were approved without corrections.

The Committee discussed that the Pharmacy Board is reviewing regulations as they relate to School Nurse and Epi Kits. The Committee will await more information.

The Committee approved KAR 60-7-110 and KAR 60-7-111 without revision.

The Committee reviewed a report on IV Therapy programs. The meeting was adjourned at 4:00 p.m.
Frequently Asked Questions about the Nurse Licensure Compact

1. How can I get a multistate nursing license?

   Kansas implements the Nurse Licensure Compact (NLC) on July 1, 2019. You will not be able to get a multistate nursing license in Kansas before that date. Nurses that reside in Kansas can obtain a multistate nursing license 7/1/19 and after by submitting an application for a multistate nursing license, pay the fee, and submit the supporting documentation. There will be communication sent to each nurse with a Kansas nursing license that lives in Kansas with the specific information about the application process. You must obtain your multistate nursing license within the state in which you reside.

2. Why would a nurse need a multistate license?

   Nurses are required to be licensed in the state where the recipient of nursing practice is located at the time service is provided. A multistate license allows the nurse to practice in the home state and all compact states with one license issued by the home state. This eliminates the burdensome, costly, and time-consuming process of obtaining single state licenses in each state of practice.

3. What is the difference between a compact license and a multistate license?

   There is no difference between a compact license and a multistate license. This terminology is used interchangeably to reference the Nurse Licensure Compact (NLC) license that allows a nurse to have one license, with the ability to practice in all NLC compact states.

4. What does Primary State of Residence (PSOR) mean?

   For compact purposes, PSOR is not related to property ownership in a given state. It is about your legal residence status. Everyone has legal documents such as a driver’s license, voter’s card, federal income tax return, military form no. 2058, or W2 form from the PSOR. If a nurse’s PSOR is a compact state, that nurse may be eligible for a multistate (compact) license. If a nurse cannot declare a compact state as his/her PSOR, that nurse is not eligible for a compact license. That nurse may apply for a single state license in any state where they wish to practice.

5. I am graduating from a nursing program. Can I take the NCLEX in a different state?

   The NCLEX is a national exam and can be taken in any state convenient to you. It is not a state exam. The results will be directed to the board of nursing where you applied for your authorization to test (ATT) and licensure:
   - If you are applying to a compact state for a multistate license, you should apply in the state where you intend to legally reside
   - If you are applying for a license in a noncompact state, you should apply for a license in the state where you intend to practice

6. I have a compact license and have accepted a temporary assignment in another compact state. My employer is telling me that I need to get that state’s license. Is this true?

   When hired in a remote state for a temporary position or commuting to a remote state from the primary state of residence (PSOR), employers should not require you to apply for licensure in the remote state when you have lawfully declared another state as your PSOR. PSOR is based on where you pay federal income tax, vote and/or hold a driver’s license. The remote state board of nursing cannot issue a license to a nurse who has declared another compact state as the PSOR, since the multistate license from the home state applies to both states. You have the privilege to practice in any remote compact state with your multistate license issued by your home state.

7. How does the NLC pertain to advanced practice registered nurses (APRNs)?

   The NLC pertains to registered nurses and licensed practical/vocational nurses’ licenses only. An APRN must hold an individual state license in each state of APN practice.

8. I have a compact license. How long can I work in another compact state?

   There is no time limit. If you maintain legal residence in the state that issued your multistate license and you remain in good standing, you may practice in other compact states if you were to take an action (while practicing in another NLC state or otherwise) which would change your legal residency status, then you have given up legal residency in that home state and you must now apply for license by endorsement in the new state of residence. The new license issued will replace the former license.

9. I live in a compact state where I have a multistate license. How do I get a license in a noncompact state?

   You may be issued a single state license valid only in the state of issuance. Applications can be found on that board of nursing's website.

10. What if I move to another compact state?

    When permanently relocating to another compact state, apply for licensure by endorsement and complete the Declaration of Primary State of Residence form within the application, which can be found on your board of nursing’s website. You may start the application process prior to or after the move. You should not delay applying once you have moved. There is no grace period.

   - If you are moving from a compact state, you may not wait until your former multistate license expires before applying in your new state of legal residence.
   - You can only practice on your former home state license until the multistate license in the new NLC home state is issued.
   - If you are moving from a noncompact state applying to a compact state in advance of the move, you may be issued a single state license, or your application may be held until you move and have proof of legal residence at which time you may be issued a multistate license.

There will be more communication in the coming weeks and months as we get closer to July 1, 2019. There is a map of the compact states and more information about the NLC at: https://www.ncsbn.org/compacts.htm

JOIN OUR TEAM AND MAKE A DIFFERENCE

Valley Hope Nurses transform the lives of patients with compassionate, focused care.

Now offering multiple opportunities:
- Moundridge I Altschiller Norton (Kansas Registered Nurse License required)

Be a part of a committed, collaborative team with a passion for exceptional patient care.

What is KNAP?
KNAP is a professional assistance program designed to assist all nurses and mental health technicians who have a problem or illness that has or could impair their ability to practice safely.

The Goal of KNAP
Mental and physical illness, including alcohol and other drug addiction, can potentially impair practice and health. We estimate that at any given time, approximately 10% of the population is affected. This same percentage is thought to be true of healthcare professionals. Alcohol and other drug addiction, as well as mental and physical illnesses, are treatable. KNAP works with the program participants to obtain an evaluation, treatment (if indicated), and monitoring throughout the recovery process.

Referrals
Self-referrals to the program are encouraged, but referrals may be made by a family member, a friend, employer or anyone concerned about the nurse/LMHT. Anonymous referrals are not accepted. A person may call for information or advice without giving their name, however. Referrals may be made by calling 913-236-7575.

KNAP Providers
- Confidential services to Kansas RNs, LPNs, and LMHTs experiencing problems and illnesses which could lead to impaired practice.
- Interventions, assessments, referrals for evaluation and treatment (if indicated.)
- On-going monitoring through random urine drug screens, contact with employers and monthly groups.
- KNAP works with the program participants to obtain an evaluation, treatment (if indicated.), and monitoring throughout the recovery process.
- On-going monitoring through random urine drug screens, contact with employers and monthly groups.
- Referrals to the program are encouraged, but referrals may be made by a family member, a friend, employer or anyone concerned about the nurse/LMHT.
- Anonymous referrals are not accepted. A person may call for information or advice without giving their name, however. Referrals may be made by calling 913-236-7575.
- KNAP Providers
- Confidential services to Kansas RNs, LPNs, and LMHTs experiencing problems and illnesses which could lead to impaired practice.
- Interventions, assessments, referrals for evaluation and treatment (if indicated.)
- On-going monitoring through random urine drug screens, contact with employers and monthly groups.

Causes for Concern
Job Function
- Narcotics discrepancies, e.g.: incorrect counts, alteration of narcotic containers, increased patient reports of ineffective pain control, discrepancies on records or frequent corrections of records, unusual amounts of narcotics wasted, significant variations in the quantity of narcotics ordered for technician’s unit or shift.
- Fluctuations in the quality of work performance.
- Irresponsible behavior from someone previously conscientious and responsible.
- Requests to work shifts that are the least supervised.
- Inordinate interest in patients’ pain control medications.

Behavior
- Increasing isolation from colleagues, friends and family and avoiding social activities.
- Complaints from others about work performance or alcohol or drug use.
- Mood swings, irritability or depression, or suicide threats or attempts, perhaps caused by accidental overdose.

Physical Symptoms
- Obvious intoxication such as swaying, staggering or slurred speech.
- Odor of alcohol on breath or the excessive use of breath-fresheners or perfume to disguise the odor of alcohol.

KNAP is supported by funds from the Board of Nursing and, in small part, by fees charged to the participants.

Landon State Office Building
900 SW Jackson, Suite 1051
Topeka, KS 66612-1230

Kansas State Board of Nursing Joins Nursys

We are pleased to announce that verifications of licensure to another state will now be achieved by a more secure and electronic process! Beginning May 12, 2017 this process will facilitate the turnaround for licensure verification to be sent to a state of your choice via Nursys®. Nursys® is the only national database for licensure verification for registered nurses (RNs), licensed practical/vocational nurses (LPNs) and advanced practice registered nurses (APRNs). Nursys® is designated as a primary source equivalent database through a written agreement with participating boards of nursing. Nursys® is live and dynamic, and all updates to the system are reflected immediately, pushed directly from participating board of nursing databases through frequent, secured data updates. Nursys®, a 24/7 nationwide database for verification of nurse licensure and discipline, will make licensure verification immediately available to the board of nursing where an individual is applying for licensure.

National Council of State Boards of Nursing (NCSBN) provides automatic license status quickly, easily, securely and free of charge to individual nurses who enroll through Nursys e-Notify. For questions regarding verifications or Nursys, including processing times, visit Nursys.com for instructions and an introductory video.

**Kansas State Board of Nursing Launches Online Applications**

Conveniently manage your nursing licenses online

The week of October 10th the Kansas State Board of Nursing (KSBN) launched their online Kansas Nursing License Portal. The portal is designed to give applicants the ability to apply and pay for their license(s) from the convenience of their home—24 hours a day, seven days a week. The service is available for all professions except mental health technicians.

The goal of the Kansas State Board of Nursing is to provide applicants a more efficient and convenient way to apply for their license. KSBN is very proud to offer this service.

The Online Kansas Nursing License Portal ties into KSBN’s current licensing system with its partnership with Systems Automation Corporation, a state government licensing system provider. It allows the user to apply for a Kansas nursing license, verify information, and manage changes to their license electronically. Through its partnership with the Information Network of Kansas, Inc., KSBN’s online Kansas Nursing License Portal also allows applicants to securely pay for online services via electronic check or credit card.

To apply for nursing licensure you must have access to the Internet and a checking account or credit card. Applicants who apply online do not have to mail in the license application. You can visit the Kansas Nursing License Portal [www.ksbn.org](http://www.ksbn.org).

We thank you for your patience while these changes are rolled out.

We also have to accept that in this day and age, mobile devices are not going away. In fact, our web traffic is increasingly trending towards mobile devices. Knowing this, we also tried to make more mobile friendly buttons, and page layouts. This should make navigation on mobile much more intuitive and hopefully, much less frustrating.

We thank you for your patience while these changes are rolled out.

The nursing population of Kansas has spoken, and we have been listening! Using feedback from helpdesk calls, walk-ins, and site search data, we have identified the common issues that people have experienced. Armed with that knowledge, we devised a plan to update and alleviate some of those problems.

The biggest obstacle seemed to be navigation. There is a lot of useful information on our website that got fragmented across many pages. We have since consolidated much of this in an attempt to make finding what you are looking for easier. On top of that, we tried to display what is used/searched most first on each page.

The Kansas State Board of Pharmacy (Board), in conjunction with the Kansas Department of Health and Environment (KDHE), is pleased to announce a new partnership with Appriss Health to provide interoperability services for all prescribers and pharmacists in Kansas to access K-TRACS, the Kansas Prescription Drug Monitoring Program, through the PDM® Gateway®. “This is an opportunity for Kansas to deliver a more efficient and patient-oriented prescription drug monitoring program,” said KDHE Secretary Susan Mosier, MD, MBA, FACS. “Integrating a patient’s controlled substance prescription data into the electronic health record helps providers treat the patient.”

The project is funded by a grant from the Centers for Disease Control awarded to the Kansas Department of Health and Environment. “Grant funds will support Gateway® connection costs for each Kansas electronic health record systems in Kansas,” said Board Executive Secretary Alexandra Blasi. “This multiagency collaboration furthers the K-TRACS mission to prevent diversion, misuse and abuse of controlled substances in Kansas, while protecting legitimate medical use.”

The Board successfully piloted electronic medical health records integration a few years ago, enabling a single sign-on for access to a patient’s medical record and prescription history. The Board will begin to model this integration statewide which will increase availability, ease of access, and use of a patient’s controlled substance prescription history for making critical and informed prescribing and dispensing decisions. Currently, prescribers and pharmacists log in to separate systems to query patient data which takes valuable time away from patient care and interaction. This integration simplifies the process by creating a one-stop-shop, making K-TRACS data directly available in the patient’s electronic record.

For more information and to request integration, please visit http://pharmacy.ks.gov/ktracsk-tracs-statewide-integrating. Integrations must be approved by the Board and will require reporting to the Board regarding such connections.

Kansas Announces Statewide Integration of Prescription Drug Monitoring Program

Adding K-TRACS Data to Electronic Health Records and Pharmacy Management Systems

Introducing “Kansas Nursing”: The Kansas Nursing License Verification Skill

Over the last five years, smart speakers such as Amazon Alexa and Google Home have changed the way Americans interact with technology. Smart speakers are devices that use voice commands and artificially intelligent virtual assistants to provide hands-free interactions with programmed skills.

According to Nielsen’s Media Tech Trender Survey, nearly 25% of American households owned a smart speaker device, with 45% of those households planning to purchase more devices for their home. While the majority of smart speaker users have only recently purchased their devices within the past 12 months, a survey conducted by Adobe projects that up to half of US consumers could own smart speakers before the end of 2018.

In light of these exciting and innovative developments, the Kansas State Board of Nursing (KSBN), in partnership with the Information Network of Kansas (INK), and the Kansas Information Consortium, LLC (KIC) are proud to announce the launch of “Kansas Nursing,” the Kansas Nursing License Verification skill for your Amazon device.

Kansas Nursing is a first-in-class solution that allows users to quickly and easily look up a license, verify the status of an existing license, or find answers to frequently asked questions. The skill was officially debuted at the Sep 10, 2018 KSBN Annual Program Administrators meeting.

By interacting with Alexa, Amazon’s interactive virtual assistant powered by artificial intelligence, users can access KSBN’s License Verification database via their Amazon Dot, Echo, or Show device. Here are some of the ways you can use the skill:

• Find your nursing license number
• Ask when your nursing license expires
• Learn about CEU requirements to renew
• Look up the status of an existing license

Kansas Nursing is now available in the Amazon app store. For more information, including infographics on how to interact with the skill, visit ksbn.kansas.gov/alexa.

KSBN is very excited to announce the launch of our Kansas Nursing Alexa skill. We are the first state nursing board in the nation to offer access to our License Verification database and agency FAQs via virtual assistant. We are committed to remaining at the forefront of technology, in order to bring the most relevant and informative offerings to those we serve.

Carol Moreland, MSN, RN
Executive Administrator, KSBN

Don’t wait for opportunity. Create it. Enroll now.

Enroll in an online nursing degree program that’s designed to fit your schedule and budget.

MSN
An 18-month program to give you the skills you need to advance your career in nursing.

RN to BSN
An online option designed by nurses for licensed, working nurses to allow you to move forward in your career at your own pace.

Be a partner for lifelong health

The Clinical Judgment Model

The Next Generation NCLEX® News is a quarterly publication that provides the latest information about the research being done to assess potential changes to the NCLEX Examinations.

In this issue, you will find information related to clinical judgment. Clinical judgment is defined as the observed outcome of critical thinking and decision making. It is an iterative process that uses nursing knowledge to observe and assess presenting situations, identify a prioritized client concern and generate the best possible evidence-based solutions in order to deliver safe client care.

NCSBN research identified a list of contextual factors that play a role in the quality of nursing clinical judgment (Dickison et al, 2016). These factors may be divided into conditions that are internal (education, experience, knowledge, communication, consequences/risk, emotions/perceptions, professional orientation) or external (task complexity, time pressures, distractions, interruptions, professional autonomy) to the nurse.

Recognizing that it was necessary to ascertain whether clinical judgment is more than just possessing nursing knowledge, NCSBN conducted a pilot study in 2016 (Muntean et al. 2016 AERA presentation). Results from this study found that while knowledge is essential, it is not enough to substantiate the clinical judgment essential to safe nursing practice. The study also indicated that the average ability of a nurse to demonstrate the different steps in the clinical judgment process (cue recognition, hypothesis generation, hypothesis evaluation, taking actions and evaluating outcomes) is progressive.

Thus, a nurse’s ability to recognize cues, develop hypotheses and take appropriate actions does not guarantee the ability to evaluate the outcomes of the action taken. Ultimately, no single element of clinical judgment adequately predicts a nurse’s clinical judgment ability; it is the combination of all the elements that add validity and reliability to the measurement of a nurse’s clinical judgment ability. In short, having content knowledge does not always translate to having clinical judgment skills.

NCSBN continues to develop item prototypes, collect data and do research on measuring clinical judgment and measuring the layers of the CJM.

The Layers of the Clinical Judgment Model

1. Recognize Cues – Identify relevant and important information from different sources (e.g., medical history, vital signs).

2. Analyze Cues – Organizing and linking the recognized cues to the client’s clinical presentation.

3. Prioritize Hypotheses – Evaluating and ranking hypotheses according to priority (urgency, likelihood, risk, difficulty, time, etc.).

References

The Next Generation NCLEX® News is a quarterly publication that provides the latest information about the research being done to assess potential changes to the NCLEX Examinations.
4. Generate Solutions – Identifying expected outcomes and using hypotheses to define a set of interventions for the expected outcomes.

5. Take Action – Implementing the solution(s) that addresses the highest priorities.

6. Evaluate Outcomes – Organizing and linking the recognized cues to the client’s clinical presentation.

In order to provide information regarding aspects of the Next Generation NCLEX (NGN) project such as the topic of the Clinical Judgment Model (CJM), the NCSBN Examinations Department has begun recording a series of videos entitled “NGN Talks.” NGN Talks are available for public viewing. The videos include 5-7 minutes of informational details about various aspects of the NGN project. NGN Talks are presented by the Examinations Department’s staff and include topics such as an introduction to NGN, item development, test validity, and many other aspects of the NGN research project. The first NGN Talk provides an introduction to the NGN project, and is now posted on the NCSBN website.

WICHITA STATE UNIVERSITY NURSING PROGRAMS

Registered Nurse (RN) to BSN (fully online)
- Earn your BSN in as little as 1 year
- Get up to 30 credit hours for prior coursework
- Build a foundation for advanced nursing degrees
  Priority application deadline: July 1 for fall; Dec. 1 for spring

Master of Science in Nursing (MSN)
This program offers two concentrations:
  - Nursing Education (fully online)
  - Nursing Leadership and Administration
  Application deadline: May 1

Doctor of Nursing Practice (DNP)
Post-BSN Entry: Advanced Practice Registered Nurse (APRN)
  Earn specialization in:
    - Family Nurse Practitioner
    - Adult Gerontology Acute Care Nurse Practitioner
    - Psychiatric Mental Health Nurse Practitioner
  Application deadline: May 1
  DNP Post Master (APRN) (fully online)
  Application deadline: Oct. 15

Why Choose Our Programs?
- Online programs offer convenience and affordable in-state tuition
- Individualized faculty advising
- High post-graduation employment rate
- Exceptional success in advanced careers
