

New Look to KSBN Website!

The staff of KSBN has been diligently working to develop and implement a new website design. The current website was developed in an older programming format and has been in place for over a decade. With new web page technology, it was determined a total redesign was needed. KSBN is currently working with the state's web provider, Kansas.gov, to help with the website development. The new web architecture was developed to take advantage of a Content Management System. This type of architecture will make the management of the site more dynamic and scalable for multiple platforms including mobile.

The mission of the Board of Nursing is to assure the citizens of Kansas safe and competent practice by nurses and mental health technicians.
